

Installing VPN on Windows 10

Before you begin

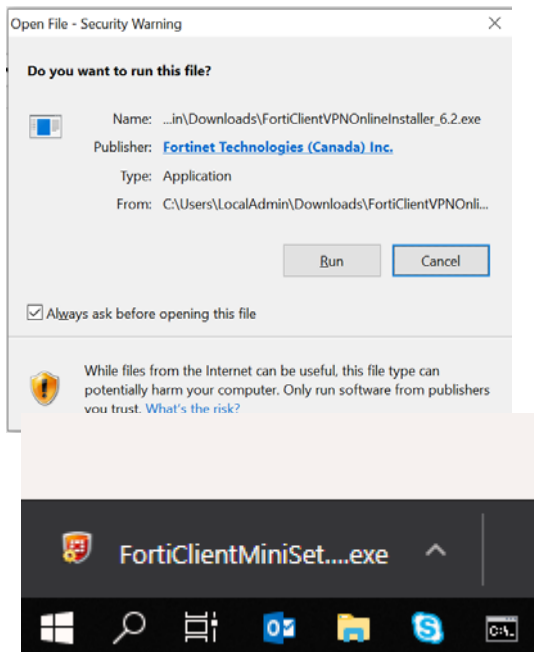

The following instruction is supported by the TU Delft and has been tested to be working. However, we offer this manual to you as an extra service, so in case you have a configuration or version of Windows other than the one described here and you have problems establishing a connection, neither ICT nor a Service Desk will be able to help you to make a successful connection

Open Internet Explorer, Chrome or Firefox and go to <http://vpn.tudelft.nl>
Log in with your NetID and password.

Select your operating system. (in this case: select Windows)

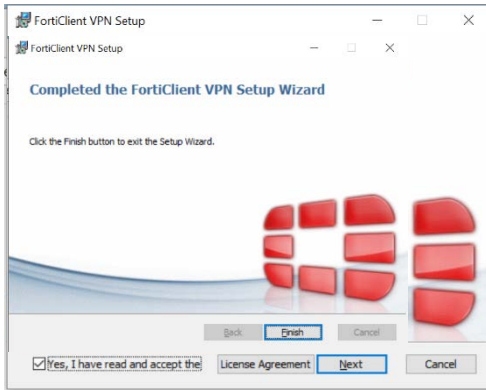

When asked, click on RUN to download the software.

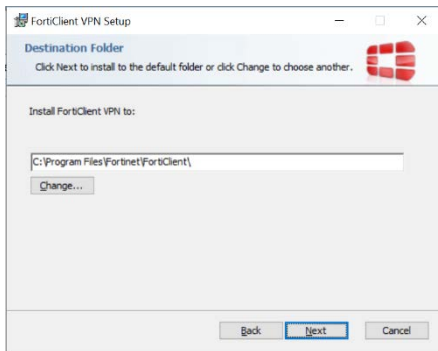

The software will be downloaded to your computer.

Install the software by clicking FortiClientMiniSetup-Windows-x64-Enterprise-6.2.3.exe

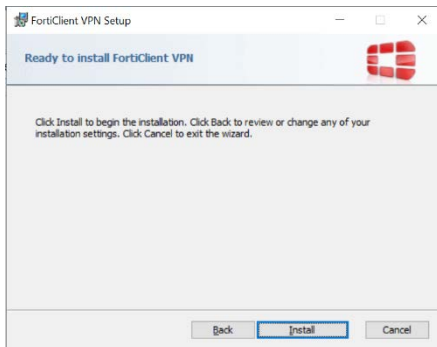

The installer starts now

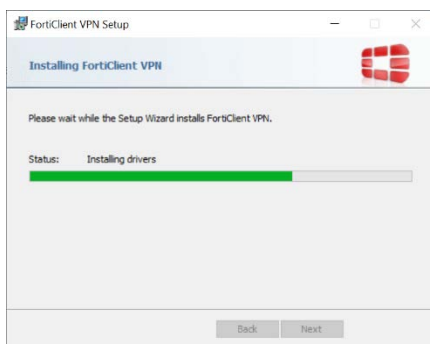

Click on 'Yes, I have read and accept the License Agreement' and select 'Next'.

Select the destination folder, select Next

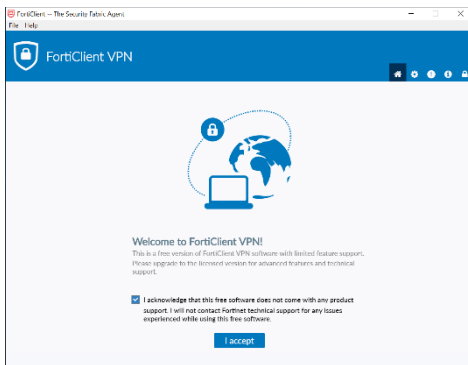

Installation starts after selecting 'Install'.

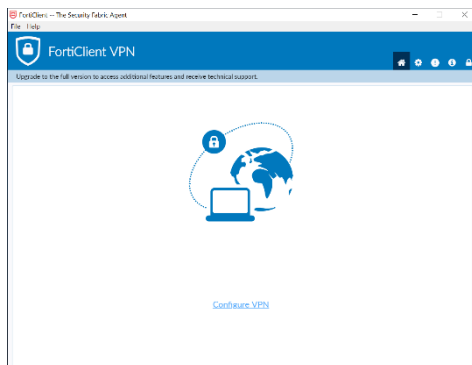

Please wait....

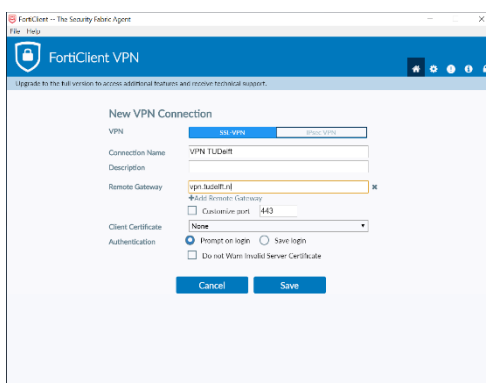

Installation is complete, click Finish.

Open the Forticlient app and configure the VPN client
Select the 'I acknowledge' checkbox and click 'I accept'.

Select 'Configure VPN'

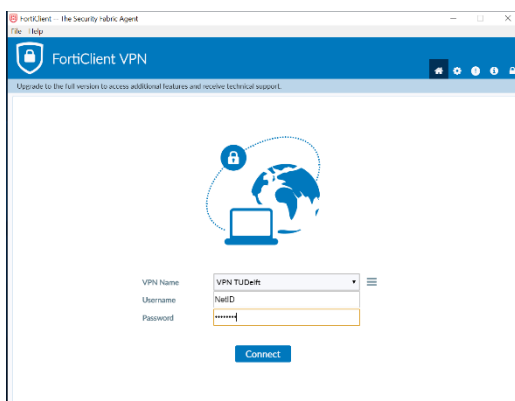

Select SSL-VPN;

Choose a logical Connection Name, e.g. VPN TUDelft;

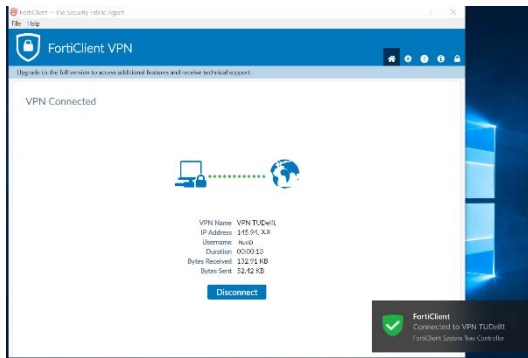

Remote Gateway: vpn.tudelft.nl

Select 'Save'.

Open the client

Fill in your Username and password and select 'Connect'

You will see the popup: 'Connected to VPN TUDelft'.
