Installing and configuring the Citrix Receiver for Weblogin

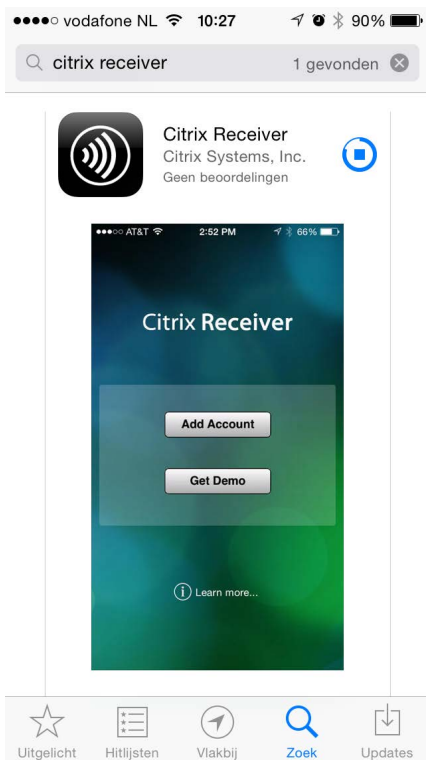

Prerequisites

In order to be able to configure weblogin properly, make sure that your NetID is working and that you have an active internet connection.

Downloading the 'Citrix Receiver' application for IOS

Step 1.

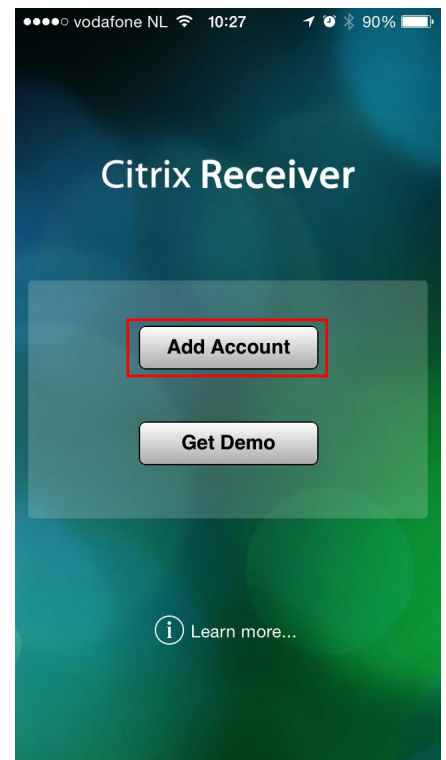

Download and install the '**Citrix Receiver**' app (free) from the App store.

Step 2.

When downloading of the app has completed, open the '**Citrix receiver**' app.

Press the 'add account' button to configure your Weblogin account.

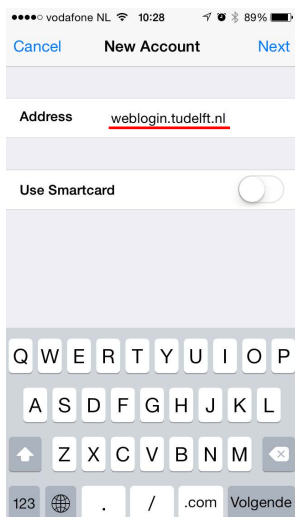

Configuring the 'Citrix receiver' Application .

Step 3.

At the address bar, fill in ;
weblogin.tudelft.nl

Press 'Next' to continue.

Leave the 'Use Smartcard Boolean' unchecked

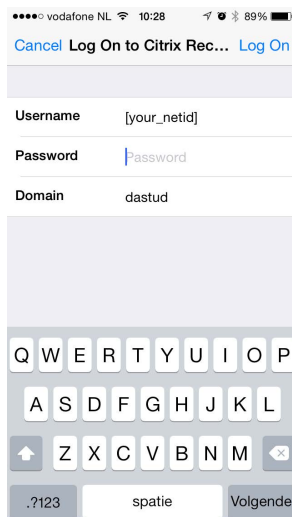

Step 4.

Complete the next form with your network credentials.

Username : [Your_NetID]

Password : your netid password

Domain : Dastud

After completing the form press 'Log On' to log on to the weblogin service.

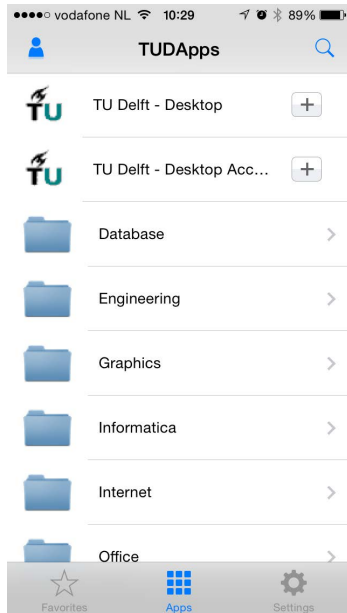

Configuring the 'Citrix Receiver' Application.

Step 5.

When the log in process completes you will be presented with the applications available for you.

You can press the folders to open them and view their underlying applications.

You can add an application to your favorites by pressing the '+' button.

Step 6.

From your favorites tab, you can quickly view and open your favorite apps.
