Study Abroad – Green Challenge DTU

Technical University of Denmark, International Student Conference and Competition 2019

Students competing in green technology

Every year, DTU hosts the international student conference and competition Green Challenge (GRØN DYST). The conference is DTU's response to the global climate and sustainability changes.

Why?

DTU believes that engineers play a pivotal role in the sustainable development of our society. It is important to give engineering students skills to contribute to the development of technological solutions that respond to the global challenges. Green Challenge is an opportunity for students to showcase the green and sustainable projects they have been working as part of their education.
