

Transition Rules MoT

2018-2019

General transition rule regarding MSc thesis project (TER: App 4, article 1):

Thesis duration arrangement starting from academic year 2018-2019 for all students of all cohorts: when a student does not pass the first green-light meeting 17 working weeks after the kick-off meeting, the graduation committee may extend the graduation process of the student by a maximum time period of 3 months (13 weeks).

The motivation to extend duration of the master thesis project has to be indicated on the green-light form, which has to be signed by a full professor or an associate professor with ius promovendi in the graduation committee, or by the former or current director of studies.

When a student does not pass the second green-light meeting within 3 months, he/she has to start with a new graduation topic and new graduation committee for which the same duration arrangement is applicable.

In case of special circumstances the Board of Examiners may deviate from the thesis duration arrangement, however only in favour of the student.

Only for cohorts 2016-2017 and earlier:

- When the student worked on his/her master thesis project before 1 September, 2018, then:
 - these weeks are not taken into account when monitoring the thesis duration arrangement.
 - the monitoring and thesis duration arrangement will start from the 1 September, 2018 on.
- When the student starts his/her thesis in academic year 2018-2019 or later the thesis duration arrangement will be applicable.
