Evaluation criteria for Building Technology

Portfolio and Letter of Motivation give the following profile of the applicant:

- The application demonstrates strong interest in the Building Technology MSc programme and presents convincing reasons for choosing the programme at TU Delft.
- The application demonstrates the ability to communicate a variety of topics in a concise way and to express ideas effectively in words, drawings and other media.
- The application shows appropriate architectural design skills, originality and innovation of ideas.
- The application demonstrates an academic attitude and the ability to formulate design goals, resulting from research or functional analysis, to create options or to explain the reasoning behind decisions.
- The application demonstrates the capability to think and design in integrated systems and to understand technical complex relations in buildings.
- The application demonstrates an appropriate application of technical disciplines such as structural design, design of construction, climate design and computational design.

All criteria must be met. Failing on one of them can lead to a rejection.
