Responsible instructors
Dr. Ir. Machiel van Dorst
Ir. Otto Trienekens

Code	AR3VA110
Credits	15 ECTS
Location	Rotterdam
Excursion	Yes
Costs	-

Studio Veldacademie aims to contribute to a future-proof and inclusive development of Rotterdam.

As a student, you have a unique opportunity to work on site in the neighbourhoods of Rotterdam and get to know the daily life in the city. This studio facilitates students fascinated by societal challenges, an interdisciplinary research and design approach and working in the field, together with multiple stakeholders such as citizens, entrepreneurs, housing corporations, project developers, researchers and municipal officials. Students can make a meaningful contribution to the city of Rotterdam.

The graduation lab is open for students of the Architecture and Urbanism track. Students can develop their own assignment, as long as it addresses an actual socio-spatial issue that is relevant for the city of Rotterdam.

A collaborative action research project is part of the studio, as well as an

individual research and design project and the organization of an excursion to a European city.

Students are offered a workplace at our studio space on the south bank of Rotterdam. Here you will experience interaction with a diverse range of professionals and stakeholders and students with various educational backgrounds such as sociology, communication and urban planning.

Students select their own design and research tutors. In addition to this Veldacademie provides a practical supervisor.

Contact us (info@veldacademie.nl) with your personal project proposal. More information and a selection of student projects can be found on <http://www.veldacademie.nl>
