Vision
TU Delft believes its role in society is to supply technological solutions that take us significantly further along the road towards sustainability and a flourishing economy. We position ourselves as an open academic community which, through our academic staff and graduates, is represented throughout the academic world while also embedded in our own regional and national, social and economic environment.

Values
The core values that guide all those associated with TU Delft are:
- Respect
- Integrity
- Expertise
- Transparency
- Avoidance of conflicts of interest

Our modus operandi as an institution is trust – by which we mean that every member of our community is expected to comply with our core values, to draw inspiration from them and to feel responsible for upholding them. Everyone at TU Delft should act with a sense of social responsibility and be aware of the value of technology's value to and its impact upon society.

• TU Delft has developed a portfolio of 16 BSc programmes (including four joint degrees), which cover the broad range of engineering disciplines.
• The University offers more than 30 MSc programmes, several of which are unique in the Netherlands.
• Some of these degree programmes are offered in conjunction with other institutions, under the auspices of either the 4TU Federation (the collaborative venture of the four Dutch universities of technology) or our alliance with Leiden University and Erasmus University Rotterdam.
• Our MSc programmes are taught in English, as are our Applied Earth Sciences, Aerospace Engineering and Nanobiology BSc programmes.
• TU Delft encourages ambitious students to participate in the Honours Programme Bachelor or Master; an extra-curricular programme designed to enrich the overall study experience.

Bachelor’s
• Aerospace Engineering
• Applied Earth Sciences
• Applied Mathematics
• Applied Physics
• Architecture, Urbanism & Building Sciences
• Civil Engineering
• Clinical Technology (joint degree)
• Computer Science
• Electrical Engineering
• Industrial Design
• Life Science and Technology (joint degree)
• Marine Technology
• Mechanical Engineering
• Molecular Science and Technology (joint degree)
• Nanobiology (joint degree)
• Systems Engineering, Policy Analysis & Management

Master’s
• Aerospace Engineering
• Applied Earth Sciences
• Applied Mathematics
• Applied Physics
• Architecture, Urbanism & Building Sciences
• Biomedical Engineering
• Chemical Engineering
• Civil Engineering
• Computer Engineering
• Computer Science
• Construction Management and Engineering
• Design for Interaction
• Electrical Engineering
• Embedded Systems
• Engineering and Policy Analysis
• Geomatics
• Industrial Ecology (joint degree)
• Integrated Product Design
• Life Science and Technology
• Management of Technology
• Marine Technology
• Materials Science and Engineering
• Mechanical Engineering
• Offshore and Dredging Engineering
• Science Education and Communication
• Strategic Product Design
• Sustainable Energy Technology
• Systems and Control
• Systems Engineering, Policy Analysis & Management
• Transport Infrastructure and Logistics

Post-master’s
• Berlage Master in Architecture and Urban Design
• European Postgraduate Masters in Urbanism

- Software Technology
Its public mission and core values place the academic institution of TU Delft at the heart of society.

Its scientists and researchers are working to resolve some of the great and pressing issues of our time in four main areas: Energy, Health, Global Development, and Deltas, Infrastructures & Mobility.

Helping to solve these and similar problems requires a considerable amount of innovative research and represents an enormous challenge for our staff and students.
Within TU Delft, high-quality research capacity is clustered - either physically or virtually - into several University-wide institutes: the TU Delft Institutes. This organisational structure helps to strengthen the scientific focus and to enlarge the critical mass. In this way TU Delft aims to enhance its external profile with a view to better positioning itself to join national and international consortia and networks, and to become more attractive to top scientific talent.

In early 2017, two new Institutes will kick-off. These are the TU Delft BIO-Engineering Institute, supported by the faculties of AS, CEG and EEMCS, and the TU Delft Institute for Computational Science and Engineering, in which six faculties will participate: 3mE, AE, AS, CEG, EEMCS and TPM.
YES!Delft is our high-tech entrepreneurship centre with a clear mission: we build the leading firms of tomorrow. We inspire students, professionals and scientists to take their first steps along the path to becoming entrepreneurs and offer them the necessary support to turn their enterprise into a ‘leading firm’. YES!Delft focuses on companies with a technological, innovative and scalable product or process.

### Delft Enterprises

Delft Enterprises is the one-stop shop for entrepreneurship and spin-out companies of the Delft University of Technology. Delft Enterprises participates in innovative, early stage and technology-based spin-off companies of TU Delft. Delft Enterprises aims to empower and speed up the development of these startups, as part of the ambition of the University to turn scientific knowledge into economic value.

Valorisation Centre

Knowledge valorisation concerns the creation of social and economic value based on scientific knowledge and skills. The Valorisation Centre stimulates and facilitates knowledge valorisation and provides the necessary support for TU Delft scientists and support staff. This includes R&D subsidies (funding for research projects), R&D project management, intellectual property, business development and cooperation with companies.

Alumni communities and events worldwide

TU Delft Alumni
Partnerships

Internal and external network relationships are crucial to our international strategic partnerships. They focus on linkages not only with academic and research institutions worldwide but also government contacts, as well as business and industry partners. These partnerships ultimately aim to find innovative solutions for today’s global challenges in both a regional and international context. The external global connections are primarily based on researcher-to-researcher networks, their curiosity and focus bringing them together in matching areas of interest in research and/or education. In short, the University’s international strategic partnerships focus thrives on these solidly built long-term faculty relationships of which a large number have grown into joint research initiatives over recent years, in both Europe and beyond. To encourage focus and maintain an initial overview of the University’s global relations, the TU Delft community started the Delft Global Initiative, focusing on developing countries in Africa & South East Asia as well as the ‘cross faculty country teams’ aiming to share knowledge and networks in specific countries, such as Brazil, Canada, China and India. The TU Delft Business Relations Unit has recently been exploring and developing relations with Germany.

Network memberships in the Netherlands and Europe

Campus & Facilities

An inspiring campus
Our campus provides an attractive environment for everyone working, studying or visiting TU Delft. It is organised in a manner designed to appeal to the lifestyle of today’s students and staff, and is flexible enough to accommodate education, research, new and established businesses, guest accommodation, as well as sporting, cultural and other leisure activities. The planned Delft Technological Innovation Campus will be closely integrated with the University campus.

Research Infrastructure
To attract outstanding scientific talent, conduct ground-breaking research and train new generations of engineers, TU Delft heavily relies upon excellent and expensive infrastructure. This makes it possible for us to test, for example, the real-life practicality of models simulated on computers – something no other Dutch university can do on such a large scale. Thois is a defining element of TU Delft’s profile within the international research landscape.

TU Delft Library
4TU.Datacentrum possesses the knowledge, experience and tools needed to archive research data in a standardised, secure and well-documented manner. It provides the research community with:
• an enduring archive for the storage of scientific research data;
• permanent access to research data and tools for its reuse;
• advice and support on data management
Research Facilities

Aerospace Engineering
- Aeroplane Hangar
- Cessna Citation II Jet Aircraft
- Cleanroom for Satellite Building
- Flight Arena ‘Cyberzoo’
- Flight Simulator Simona
- Kite Laboratory
- Micro Air Vehicle Laboratory
- Propulsion Lab (being built now)
- Structures & Materials Lab
- Wind Tunnels (Low and High Speed Tunnels)

Applied Sciences
- Chemical Labs
- Fermentation Labs
- Molecular biology Labs
- Bioprocess Pilot Facility
- Imaging Facility
- Advanced Imaging Labs
- Laser Labs
- Cleanrooms
- Nuclear Research Reactor, incl. Neutron and Positron Beam-line Instruments and Irradiation Facilities

Civil Engineering and Geosciences
- Cloud Lab
- Geodesy/GNSS Lab
- Smart Mobility Lab
- Drones for Traffic and Geological Research
- CT Scanner
- High Pressure & Temperature Facilities
- Geo-technical Centrifuge
- Macro Lab
- Micro Lab
- Biohazard 1 Wastewater Treatment Lab (ML1 lab)
- Water Engineering Experimental and Analytical Lab (e.g. GC, IC, HPLC, Water Isotopes)
- Flooms for Waves, Currents and Sediment Transport
- Jetski Mobile Platform for Coastal Fieldwork

Architecture and the Built Environment
- Architecture Model Hall
- 3D Printers
- 3D Lab
- Lasercutters
- CNC Milling Machines
- Render Farm
- Sense Lab
- Product Development Lab
- Architecture Library:
  - 35,000 Books
  - 14,000 Maps
  - 550 Atlases
  - 260 Magazine Titles
More information can be found at: labs.tudelft.nl
History of the University

1842-1864: Royal Academy
On 8 January 1842, King Willem II founded the ‘Royal Academy for the education of civilian engineers, to serve both nation and industry, and of apprentices for trade’. The academy also educated civil servants for the colonies and revenue officers for the Dutch East Indies.

1864-1905: Polytechnic School
An Act was passed on 2 May 1863 imposing regulations on technical education as well as bringing it under the influence of the rules applying to secondary education. Then, on 20 June 1864, a Royal Decree was issued ordering the Royal Academy in Delft to be disbanded to make way for a new ‘Polytechnic School’. The school went on to educate architects and engineers in the fields of civil engineering, ship-building, mechanical engineering and mining.

1905-1986: Institute of Technology
On 22 May 1905, an Act was passed acknowledging the academic level of the Polytechnic School’s technical education and it became a Technische Hogeschool, or Institute of Technology. Queen Wilhelmina attended the Institute’s official opening ceremony on 10 July 1905. The Institute’s first Rector Magnificus was the Professor of Hydraulic Engineering ir. J. Kraus. The Institute was granted corporate rights by an Act passed on 7 June 1956.

1986-present: Delft University of Technology
An Act which took effect on 1 September 1986 officially transformed the Institute of Technology into Delft University of Technology, abbreviated to TU Delft from the Dutch name Technische Universiteit Delft.

* Cells containing the symbol "-" are positions that are not (yet) available for the concerning ranking and year
The city of Delft is strategically located at the heart of the Dutch knowledge economy and is within easy reach of the TU Delft campus by bike or public transport. The close connection between the city and the University brings together the best of both worlds. Over the past two decades, Delft has rapidly transformed from an industrial centre into a hub for the Dutch knowledge economy. Delft is a historical city that was established in the 13th century with a rich history including the world-famous Delft Blue china, celebrated painters such as Johannes Vermeer and scientists such as the inventor of the microscope Antoni van Leeuwenhoek. Delft’s slogan is: ‘Delft, creating history’. But Delft is also constantly looking to the future to ensure the city remains vibrant and prosperous. The university and companies based in Delft play an important role in this mission.

**City of Delft statistics**
- Square kilometres: 24
- Population: 101,033
- Cafés, bars and restaurants: 296

**Connectivity**
- To Rotterdam by car: 15 km, 20 min
- To Rotterdam by train: 10 services per hour, 15 min
- To Amsterdam by car: 66 km, 44 min
- To Amsterdam by train: 4 services per hour, 58 min
- To Schiphol airport by train: 6 services per hour, 40 min
