

Looking at the Outside World: Never Urgent but always Important

ENGINEERING EDUCATION IN A RAPIDLY CHANGING WORLD

Rethinking the Vision for Higher Engineering Education
Second Revised Edition

Initiative

A blog for everybody who is engaged in developing, producing or enhancing courses or curricula in higher engineering education, or who simply wants to stay informed about our changing world.

I am involved in many bodies at faculty, university and 4TU level, and a member of national and worldwide bodies in engineering education. This keeps me up to date about the latest developments and trends, which I communicate through my blog:

www.aldertkamp weblog.tudelft.nl

Contact

Aldert Kamp
Faculty AE
TU Delft Leader 4TU.CEE
& Co-director CDIO
a.kamp@tudelft.nl

Objective

To disseminate the stories and visions, give my opinions and interpretations, and make my Delft, national and international colleagues part of my world, inspire them and hear their voice and opinions about engineering education in my blog posts. I write these posts in a strictly individual capacity.

Subjects

Virtual Reality in engineering education, interdisciplinary education, future engineering skills, continuous professionalisation, makerspaces, employability, professional engineering roles, entrepreneurial behaviour, employability, living labs, 4TU.CEE innovation projects, study abroad, TU Delft Vision on Education, teaching community, etc.

4TU. CENTRE FOR
ENGINEERING EDUCATION
