

# Risk Management Summer Course

Super practical 2-week program: 8-19 July '19

Delft University of Technology - Netherlands

Add ISO certification to your CV for a fraction of commercial rates

**Update your business knowledge of the world's leading ISO standards on Risk, Information Security, Supply Chain Security and Business Continuity**

*Due to our unique TU-Delft supported program, our fees are on average 50% below market rates.*

Includes optional **Foundation** and/or **Advanced** (Lead Implementer/Auditor) **ISO exams**:

- **ISO 31000** Risk Management
- **ISO 22301** Business Continuity
- **ISO 27001** Information Security
- **ISO 28000** Supply Chain Security

Get ready for 'real world' threats

## Super practical multi-faculty 2-week program at the start of summer 2019

3 European Credit Transfer System (ECTS) points\*

**Learn from corporate and academic (incl international) guest speakers, how to protect an organisation against flood, cyber, supply chain, aviation, chemical and other risks, and achieve better Business Continuity.**

This annual Summer Course is always refreshed with the latest best practice and case studies. It's the perfect way to familiarise yourself with real-life business risks, and how to implement controls to reduce their impact and likelihood.

Week 1 of this special program features the popular world standard on Business Continuity (ISO 22301) and Risk Management (ISO 31000) including a disaster drill exercise that enhances participants' scenario planning skills.

Week 2 covers Information Security Management (ISO 27001) and Supply Chain Security (ISO 28000) including cyber crime case studies and a data breach simulation game.

The ISO exams are governed by the world wide established **Professional Evaluation and Certification Board (PECB)**, providing you with the latest international credentials after passing the exam and getting global certification.

*\* To earn the full 3 ECT points, full 2-week attendance and a case study post-program are required.*

**Monday 8<sup>th</sup> – Fri 19<sup>th</sup> July 2019**

**Delft University of Technology, Netherlands**

# Week 1: Risk Management & Business Continuity

**In week 1 (8-12 July 2019), we will discuss generic Business Continuity and Risk Management principles, hear from international guest speakers on a range of relevant threats and study the ISO 22301 and ISO 31000 standards**

Highlights include:

- Risk and Crisis Communication
- Business Continuity & Contingency Planning 'best practice'
- Simulation games
- Flood risks including forecasting
- Aviation risks including examples
- Chemical Disasters
- Risk calculation methods
- World-class experts sharing their specialised knowledge
- ISO 31000 & ISO 22301 global standards covered in detail
- Exam training and up to 2 optional ISO exams (Foundation and/or Advanced)

**Choose ISO Foundation, Lead Implementer/ Auditor and/or Lead Risk Manager exam level(s), to obtain global ISO certification & international recognition**

## Week 2: InfoSec and Supply Chain Security

**In week 2 (15-19 July), we will discuss Information Security (InfoSec) Management and Supply Chain Security, including cyber threats, hear from international guest speakers on the latest developments and study the ISO 27001 and ISO 28000 standards**

Highlights include:

- Cyber Security case studies
- ISMS (Information Security Management System) approaches
- Information Security controls
- The ISO 27001 and ISO 28000 global standards
- An interactive security breach simulation game in teams
- A range of corporate and academic, national and international guest speakers and participants
- Exam training, sample exams and optional ISO certification exam (Foundation and/or Advanced)

**Choose ISO Foundation, Lead Auditor and/or Lead Implementer exam level(s), to obtain global ISO certification & international recognition**
